Partnership with the UNDP

Hire is a township of some 40,000 people, which is located approximately 15km from Newcrest’s Bonikro mine. The town has developed rapidly in recent years, and much of the growth has been driven by Bonikro, as well as other mining activities in the region. At this stage, the facilities and services in Hire are not adequate to cope with the population. Therefore, the company has undertaken a town sanitation and maintenance project as a major capacity-building exercise in partnership with UNDP.

The objective is to facilitate adequate waste management and drainage controls to ensure that the needs of the local population are met. The Newcrest-UNDP sanitation project aims at achieving a fundamental re-evaluation and re-education on how a micro-society should manage their wastes in a developing urban setting where people are not fully educated in the management of modern waste.
